 Serpentine Belt
 Racor Fuel Filter
 Secondary Fuel Filter

DECK LAYOUT

The American Tug 395 deck arrangement is simple and efficient. The bow is easily accessible from the pilothouse doors with grab rails above and forward of the door. The 1¼" rails provide solid grab rail integrity and hand holds. The foredeck offers range of motion when moving about tending to dock lines or the anchor and windlass. The windlass is operated from the pilothouse or the foredeck. Moving aft to the cockpit is through the cabin or along the side decks. The cockpit provides access to the upper salon deck above the main salon via a ladder to the port side. The upper salon top is an ideal lounging spot for harbor viewing or catching some sun. A center hinged boarding door provides a secure cockpit while underway and flush access to the swim platform while anchored or dockside. The telescoping swim ladder eases water ingress and egress. There is a small storage locker to starboard and below through the lazarette door.

INTERIOR LAYOUT

The two cabin single head floorplan of the American Tug 395 is well suited for four people with the carryover of two additional people in the convertible settee in the salon for sleeping accommodations. Forward is the master stateroom with a comfortable centerline island berth. The stateroom has a full-length hanging locker to starboard and two half lockers to port. Wing shelves port and starboard side of the berth offer reachable nightstand tops with drawers below. Four drawers at the foot of the berth provide additional storage. Three cubby storage lockers on both port and starboard side of the berth above leading aft from the head of the berth create additional storage. Moving aft from the master stateroom the head is located aft and to port. A single sink vanity with storage sink level behind and below for toiletries and reachable items. The towel rod above the head is readily accessible from the shower or vanity. The shower stall is ample with three shelves for bath products. The second stateroom is adjacent to the head and offers a double berth. Comfortable and roomy, abundant storage and great accent lighting are highlights. Two portholes and a hatch offer great ventilation on those perfect nights. Up four stairs through the companionway is the Pilothouse. Two seats to port and starboard with footrests allow a commanding view ahead through the three forward facing windows. The helm is to starboard. A full width console houses the electronics. Ventilated windows are forward of the PH doors, hatch with Oceanaire screens and sunblock and two aft facing windows looking across the upper salon top. The Pilothouse offers access to the side decks via doors to both port and starboard. Moving aft through the companionway and down three stairs you'll find the main salon and galley area. The main salon consists of the dinette to port that converts to a large double berth and the galley to starboard. The galley provides an induction stovetop and separate convection microwave, separate fridge, freezer, drawers and cupboard and a dual bowl SS corner sink. The 6 large panoramic windows in the salon, 2 of which open for ventilation and have privacy and darkening shades. The cockpit is through the aft hinged door.
